Jordan Rivera

Senior Software Engineer, Backend & Platform

xyz@abc.org | 111-111-1111 | Austin, TX (remote-first / hybrid-OK) | https://example.com/jordanrivera

SUMMARY

Senior Software Engineer, 9 years across fintech, logistics, and consulting work, who builds internal platforms teams choose to adopt and keeps high-volume services fast and reliable. Built a shared deploy platform that 6 teams moved 40+ services onto, and cut payments-API p99 latency ~60% at ~1.2M transactions a day. Go, Kubernetes, Terraform, AWS. IC who mentors 3–4 engineers.

EXPERIENCE

Senior Software Engineer, Acme Pay Mar 2021 – Present

Austin, TX (remote)

- Built Acme Pay's first shared deploy platform (Go, Kubernetes, Terraform, GitHub Actions) and moved 40+ services from 6 teams onto it, cutting deploy lead time from ~3 days to under an hour.
- Cut payments-API p99 latency ~60% at ~1.2M transactions a day by fixing PostgreSQL query plans and adding a Redis read path with write-through invalidation.
- Introduced SLOs, OpenTelemetry tracing, and runbooks, bringing Sev-1 incidents from 14 to 5 a quarter and recovery time under 20 minutes.
- Designed idempotency keys and a Kafka outbox for payment events, ending a class of duplicate-charge bugs. Cut compute spend ~35% with right-sizing and autoscaling.

Software Engineer II, Acme Corp Jun 2018 – Feb 2021

Austin, TX (hybrid)

- Built the order-routing service from scratch in Go, replacing a Python cron job with an event-driven Kafka consumer and tripling peak throughput.
- Cut the CI pipeline from 41 to 14 minutes by parallelizing tests, caching builds, and quarantining flaky tests.

Software Engineer, Acme Inc Jul 2016 – May 2018

Austin, TX

- Built backend APIs for 6 consultancy client projects in Python and PostgreSQL, including a retail inventory sync that went to production at 40 stores.

PROJECTS

Open-source Go middleware 2019 – Present

Contributor. 23 merged PRs to a public Go HTTP-middleware library, mostly retry and timeout handling. 2 meetup talks on platform engineering.

SKILLS

Go | Python | SQL | Distributed systems | Microservices | gRPC and REST APIs | Kafka | PostgreSQL | Redis | AWS | Kubernetes | Terraform | CI/CD | Observability (OpenTelemetry, Prometheus)

EDUCATION

B.S., Computer Science, Acme State University, Austin, TX, 2016
