Jordan Rivera

Staff Software Engineer, Platform | Kubernetes, Terraform, Go

xyz@abc.org | 111-111-1111 | Austin, TX (remote-first / hybrid-OK) | https://example.com/jordanrivera

SUMMARY

Senior Software Engineer, 9 years across fintech, logistics, and consulting work, focused on platform engineering and reliability. Built Acme Pay's first shared deploy platform and moved 40+ services from 6 teams onto it, cutting deploy lead time from ~3 days to under an hour. Writes the design doc, gets it through review, and mentors the engineers who build on it, targeting Staff IC scope.

EXPERIENCE

Senior Software Engineer, Acme Pay Mar 2021 – Present

Austin, TX (remote)

- Built Acme Pay's first shared deploy platform (Go, Kubernetes, Terraform, GitHub Actions) and moved 40+ services from 6 teams onto it, cutting deploy lead time from ~3 days to under an hour.
- Built the payments observability stack (SLOs, OpenTelemetry tracing, runbooks), bringing Sev-1 incidents from 14 to 5 a quarter and recovery time under 20 minutes.
- Cut AWS compute spend ~35% by right-sizing services, adding autoscaling, and moving batch jobs to spot capacity.
- Cut payments-API p99 latency ~60% at ~1.2M transactions a day. Mentors 3–4 engineers and runs the weekly design review.

Software Engineer II, Acme Corp Jun 2018 – Feb 2021

Austin, TX (hybrid)

- Built the order-routing service from scratch in Go, replacing a Python cron job with an event-driven Kafka consumer and tripling peak throughput.
- Improved developer experience by cutting the CI pipeline from 41 to 14 minutes with parallel tests, build caching, and a flaky-test quarantine.

Software Engineer, Acme Inc Jul 2016 – May 2018

Austin, TX

- Built backend APIs for 6 client projects in Python and PostgreSQL, including a retail inventory sync that went to production at 40 stores.

PROJECTS

Acme Pay deploy platform 2022 – Present

Tech lead. Service manifests to Kubernetes, Terraform modules, canary deploys with automatic rollback.

SKILLS

Platform engineering | Go | Python | Kubernetes | Terraform | AWS | CI/CD | GitHub Actions | Observability (OpenTelemetry, Prometheus) | SLOs | Kafka | PostgreSQL | Distributed systems

EDUCATION

B.S., Computer Science, Acme State University, Austin, TX, 2016
